

Tiger Safety Screw Cam Clamp Model No. CSS

Main Features

- Range – 500kg to 6.3t
- Spherical universal designed screw cam provides an extra powerful clamping force on a workpiece even when vibrations occur during operation.
- Cam holder and collar have phosphorescent (glow-in-the dark) paint for easy recognition of adequate torque tightening.
- No tools required – integrated adjusting screw spindle
- 4:1 factor of safety

These units meet the requirements within BS EN 13155:2003.

The Tiger CSS safety screw cam clamp with Double Eye Anchor Points & Safety Torque Feature is suitable for many applications. This screw cam clamp has many uses, such as lifting, lateral pulling and turning over materials. Adequacy of tightening can be confirmed by the visual torque safety feature. The main body of the clamp is special alloy steel, mold forged and processed with optimal heat treatment making it extremely strong and durable. The disc spring built into the body of the clamp prevents loosening of the screws. The spherical based cam tilts in proportion to the lifting load so the contact surface becomes larger and clamps more firmly. There are two shackle holes - one opposite the screw and the other at a right angle direction, so you can choose the most suitable hole for your application.

Certification:

Each unit comes fully certified with a test certificate or an EC Declaration of Conformity stating compliance with the essential health and safety requirements of the Machinery Directive 2006/42/EC.

Untorqued

Torqued – ready for use

Luminescent indicators - cam holder and collar have phosphorescent (glow-in-the dark) paint for easy recognition of adequate torque tightening.

Home of the Tiger pneumatic hoisting, manual hoisting, clamping and winching ranges

Examples of use:

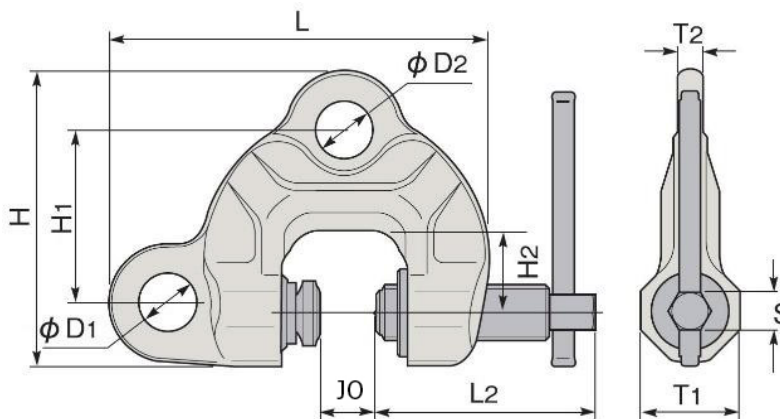

Always lift workpieces at two or more points for safety.

Recommendation:

We advise that structural calculations are carried out on all beams and supporting steel work by qualified engineering departments to ensure safe operation.
